

## Jewel of the Cosmos: Unlocking the Mysteries of Genesis 1-3

There are so many questions and controversies surrounding the first three books of Genesis, but especially Genesis One. Science claims that evolution is a fact and denies all creation theories. Some religions claim God creates everything in the universe by speaking a few words and everything comes into existence instantly. Still other theologies say that God creates everything in six 24-hour days. Will we ever be able to know whos right? Jewel of the Cosmos sorts through the competing theories and addresses the controversies that even after 5,000 years of science and theology offering their views, many mysteries continue. The book is a systematic exegete of each period of creation in Genesis One to bring to light areas of contention and controversy associated with some interpretive positions of Creation and resolves those using Scripture alone, not science or theology. The book begins with a very thorough exegete of each verse of Genesis One with New Testament support. The book answers many of the lingering questions like: If God created everything good, where does evil come from? Did God create good and bad angels and if so when did this happen?

If the sun is created in day four, what is the light in day one? Does Genesis not speak about the creation of the universe? Is evolution and Scripture compatible? Did God create cavemen, dinosaurs and dragons? A systematic verse by verse exegete of Genesis One answers these and many more questions. Jewel of the Cosmos reveals that God and science are not contrary to one another; but that pseudoscience and errant theology are the ones with the divergent views. True science and theology are both servants of God in that both reveal God from two different perspectives. Science reveals God via natural revelation and discovery; Theology reveals God through written revelation and Scripture. When both do

their jobs honestly and without an agenda, both complement each other perfectly. Jewel of the Cosmos examines science and theology and then compares and contrasts them with the systematic exegesis of Scripture. The results are eye opening. The book continues to exegesis the least examined but most important aspect of creation, that being God's Creation Sabbath and what it means. When God ceased His work on the seventh, does that mean He rested? What is the true meaning and intent of this day? Jewel of the Cosmos concludes with the expulsion, penalty and the hope for man's redemption through Messiah Jesus, and a discussion of how the many Sabbaths God gave to Moses all point to Messiah Jesus.
