

Behavior Modeling - Instructor Manual

Behavior modeling has been a highly successful training method for centuries. However, refinements based upon extensive research about its components began only recently. This manual presents the fruits of this research, and provides hands-on, proven, detailed instructions for productive implementation. It is designed to be used in conjunction with BEHAVIOR MODELING TRAINING FOR DEVELOPING SUPERVISORY SKILLS: TRAINEE MANUAL by the same author, which contains multiple copies of various forms that the trainee will use.
