

# The Mormon History Associations Tanner Lectures: The First Twenty Years

The Tanner lectures, now firmly entrenched as an institution at the annual Mormon History Association meetings, were established in 1980 as a means of providing scholars of Mormonism with a valuable new perspective for their historical record. All twenty-one lectures are presented by well-known non-Mormon scholars that were invited to prepare presentations in their own specialties that also encompass some aspect of Mormon history. In the course of preparing their talks, the presenters are expected to immerse themselves for a year in current historical writings on Mormons and Mormonism. As this collection amply demonstrates, when these scholars do their homework, the results are enlightening. This volume includes the Tanner lectures for the last two decades of the twentieth century, a general introduction, and specialized introductions to each individual lecture.
