

The Moonflower Diaries is a phantasmagoric work of futurist fiction that tells the story of a young woman's journey through two widely-separated lifetimes, during each of which her love for a beautiful girl who is her mirror image draws her back into her arms. The author weaves together elements of steamy lesbian romance with a dark, dystopian tale that paints a disturbing picture of humanity's future. But despite its flights of fatalism, the novel is, at heart, a celebration of the indomitable power of sexual longing to transcend the most daunting obstacles that lie in its path.
